

CENTUM ELECTRONICS LTD.

www.centumindia.com

Established in 1994 and based in Bangalore India, Centum provides customers with customized product design, development, manufacturing, service and component solutions for high reliability applications. The list of customers is a testimony to its ability to combine product reliability, performance and competitive pricing with a strong customer-focused approach. Centum Electronics Limited is a public listed company, listed on National and Mumbai stock exchanges. Being a leading Indian Industry, Centum has around 1400 employees and revenues of Rs 500 crores. More than 75% of the revenues are from export sales.

Centum addresses mission and enterprise critical customers in the Space, Defence, Aerospace, Communications, Industrial, Automotive and Medical markets. Centum utilizes a range of high reliability design and manufacturing technologies including thick and thin film hybrids, wire bonding, chip on board, surface mount and mixed technology PCBA. Our quality systems and processes include MIL-PRF-38534, MIL-STD-883E, MIL-PRF-55310, ISRO-PAX-300, ISO 9001:2008, ISO/TS16949:2009, AS9100:2009 Rev C and ISO13485:2003.

At the helm of the group is a strong and experienced management team. To ensure focus, the Group has three business units:

Centum Strategic Electronics: The Strategic Electronics Business Unit offers design services and develops electronics products for defence and space customers. Centum is a leading industry partner for India's DRDO labs, Defence PSUs as well as key international defence companies in several critical programs. It is also a key partner for the Indian Space Research Organization having delivered mission critical electronics on almost all satellite programs over the last decade.

Centum EMS: The Electronics Manufacturing Services business unit addresses high-mix low-medium volume products in the defence, aerospace, industrial, medical and telecom segments. The offerings include box builds, system integration, PCBA, test, environmental screening and repair & return services.

Centum Rakon: Centum Rakon, a joint venture between Centum Electronics Ltd, India and Rakon Ltd, New Zealand, is engaged in the design and manufacturing of high performance frequency control products for the Telecommunications, Industrial, Defense, Aerospace and Space markets. The product range includes OCXO, TCXO, VCXO, clock oscillators and filters.

Centum Industries: Centum Industries is engaged in the manufacture and assembly of mechanical products. They provide engineering solutions to various requirements in the field of plastics and sheet metal for the industrial customers.

The success of the group is based on a strong foundation of its core values of Teamwork, Technology and Trust.
