

GLOBAL MARKETING SERVICES
www.gms-india.com

Global Marketing Services is a rep company based in Bangalore mainly dealing with equipment, components and materials for the Thin Films, semiconductors, microelectronics, MEMS, LED and Solar applications. We offer a range of products for these applications right from basic substrates like silicon wafers, components like sputtering magnetrons, power supplies, equipment like sputtering and e-beam evaporation systems, thin film measurement equipment and various other device fabrication and assembly equipment and materials as well.

Global Marketing Services started its operations in 2001 with the main objective to support customers in niche areas and offer world class products with services. We have several installations of our equipment at different labs, institutes like IISc, IITs, DRDO labs, Space departments and many large public and private companies like Bharat Electronics, Moser Baer, Tata BP Solar and our materials and components are sold to almost every university and labs in India.

Global Marketing Services has an exhaustive listing of products for the above applications and many have been listed on our website www.gms-india.com.

Visit us at the ICEE 2014 to know more about recent trends in Glass Wafers for MEMS from Plan Optik, Germany and Photomasks from Compugraphics, UK.
