

Company overview

As a pioneer of vacuum technology, Oerlikon Leybold Vacuum offers a wide range of vacuum components, standardized and fully customized vacuum solutions, complemented by vacuum technology accessories and instrumentation.

Leybold Vacuum is serving the vacuum industry since 1850. We are one of the world's largest suppliers of high vacuum equipment. Our motto is to provide vacuum solutions responding quickly to customers' requirements & is inherently reliable with respect to products, services & organization. We are committed to quality & our quality assurance program helps us to reduce the manufacturing time, delivery time & improves quality requirements. We have state of the art production facilities in Europe, Asia & USA, and a worldwide network of service organizations-matching the regionally differing market requirement.

We are committed to quality & our quality assurance program helps us to reduce the manufacturing time, delivery time & improves quality requirements. We have state of the art production facilities in Europe, Asia & USA, and a worldwide network of service organizations-matching the regionally differing market requirements, with about 1400 employees globally.

Our Core competencies

Oerlikon Leybold Vacuum offers a wide range of advanced vacuum solutions for use in manufacturing and analytical processes, as well as for research purposes.

The company's core capabilities center on the development of application and customer specific systems for the creation of vacuum and extraction of process gases.

Oerlikon Leybold Vacuum's ability to meet highest requirements of most complex applications gives our customers the competitive edge to succeed. High duty processes in metallurgy, clean-room conditions at worldwide renowned institutes for research and development, or coating applications of minute dimensions – Oerlikon Leybold Vacuum offers highest performance.

To meet the diverse needs of applications Leybold Vacuum offers a comprehensive range of different technologies. Our vacuum products play a vital role in vast range of applications including Metallurgy & Industrial applications, vacuum drying, vacuum insulation, refrigerator manufacturing, semiconductor manufacturing, R&D applications, TV tube manufacture, lamp manufacture, High Energy physics etc.

Market segments

Areas of application are to be found in the every-day-life processes such as air conditioning, TV-tubes and automotive applications, but also in high technological processes like coating of microchips, CDs and DVDs, as well as in the manufacturing of optical glass or analytical instruments.

With the experience of more than 162 years in vacuum technology, Oerlikon Leybold Vacuum offers a broad know how of processes and applications to their customers, supported by a worldwide sales and after-sales network. Oerlikon Leybold Vacuum ranks among the top three providers in its specific business segments, which are Process Industry, Information Technology

Major locations with sales & after sales network

Oerlikon Leybold Vacuum has a wide, global net of manufacturing sites, service centers and business offices all over the world.

With 32 own locations and 48 agents and representatives Oerlikon Leybold Vacuum offers its customers the largest sales and after sales network of the vacuum technology industry.

Welcome to Oerlikon Leybold Vacuum India Pvt Ltd

Oerlikon Leybold Vacuum India has Headquarters in Bangalore, Karnataka, the Southern part of India. OLV in India offers a wide range of innovative and established products, Solutions and Services in the field of vacuum technology across the country

We started our operations in India in 2005. We introduced ourselves as a new team of Oerlikon Leybold Vacuum India, who are committed to our customers to provide advance technology, quality & service application support, that our customers requires in today's fast changing business environment. We have started our Service Centre in Bangalore and Pune with well-equipped and trained Service Engineers geographically located all over India, to support in case of applications and after sales.

We are stocking spares for our products in Bangalore and Pune to extend service support to our customers. We also keep the Standard Vacuum Pumps and Helium Leak Detectors to support the customer during the breakdown. We are also having calibration facilities for Vacuum Gauges (Any Make), which will have traceability to National and International standards.

Our brief Product range covers the following products:

- Oil Sealed Rotary vacuum pump
- Rotary Piston Pump
- Scroll / Piston / Diaphragm Dry pumps
- Industrial Dry Pumps
- Roots Pumps
- Industrial High Vacuum Oil Diffusion pumps
- Turbomolecular Pumps
- Cryo pumps
- High Vacuum Pumping systems
- High Vacuum Thin film Deposition systems
- Vacuum Gauges & controllers
- Helium Leak detector
- Vacuum valves, fittings, feedthroughs and many more.
